

REMARKS

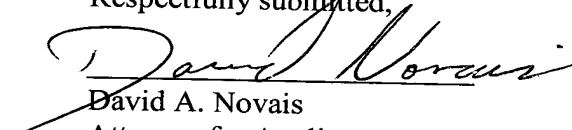

The present supplemental preliminary amendment corrects a deletion with respect to the brief description of Fig. 8 made by way of the first preliminary amendment filed on June 20, 2003. More specifically, the present supplemental preliminary amendment amends the brief description of the drawings section of the specification to add a brief description of Fig. 8 which was deleted by the first preliminary amendment filed on June 20, 2003.

The present supplemental preliminary amendment includes Fig. 8 and requests entry of this figure which was not included in the filed application. Applicants note that support for Fig. 8 as submitted by the present supplemental preliminary amendment is found in the present specification as filed. More specifically, on page 11, lines 1-8 of the present specification, it is described that in a further embodiment of the invention, "wallet-type member 10 includes a single tab 24' and a removable portion 14a as shown in Fig. 8". As also described in this section of the specification with respect to Fig. 8, "a perforated or tear line between tab 24' and the top of wallet-type member 10 is not necessary. This embodiment permits the user to remove portion 14a to display a desired photographic print and provide identifying information on the single tab."

Therefore, support for Fig. 8 as submitted by the present supplemental preliminary amendment is fully found in the original specification as filed since page 11, as noted above, describes the single tab 24' shown in Fig. 8, describes that a perforated or tear line is not necessary which is consistent with Fig. 8 which does not include the tear line, and describes that the embodiment of Fig. 8 can be used by removing portion 14a to display a desired photographic print. Therefore, Fig. 8 as submitted by the present supplemental preliminary amendment does not raise the issue of new matter, finds full support in the originally filed specification and should be accordingly entered.

Attached hereto is a marked-up version of the changes made to the specification by the current amendment. The attached page(s) is captioned **"Version With Markings To Show Changes Made."**

Respectfully submitted,

David A. Novais
